

THE BUSINESS CLINIC

R_x for Business Success

Avoid expensive accidents, maximize your company's safety record and increase profitability

HOW WE DO THAT

An employee or potential hire takes our proprietary online safety assessment which quickly pinpoints those individuals who are likely to exhibit accident prone behaviors.

This results in a significant reduction in accidents which minimizes insurance costs and costly settlements.

This assessment quickly lets you know who is most likely to be accident prone so appropriate decisions on fitness for a position and remedial training can be made.

BENEFITS

- **REDUCE ACCIDENTS** by measuring employee's risk factors
- **INCREASE PERFORMANCE & PROFITABILITY** - Integrate people metrics into the company's present safety program
- **REDUCE ACCIDENTS** - Identify "knock out" factors that include technical, mental, personal & cultural fit
- **HIRE SMARTER** - Target top performers for when hiring and create an individualized safety developmental path

SEE HOW IT PERFORMS IN YOUR COMPANY

For qualified prospects with current employees having chargeable accident instances, we will run a free test using a list of 30 employees you give us. Some accident free, others with accidents - only you know which is which. We'll show you the results then you decide.

ENVIRONMENTS CHANGE...

Environments change, but the mental "skills" that cause accidents do NOT change. Multiple studies in multiple jobs in multiple industries clearly show that *the mental skill sets of those with chargeable accidents is DIFFERENT than those who have not had chargeable accidents.*

Safety/Risk Assessments are used by Fortune 50 within the Construction, Manufacturing, Healthcare, Education, Insurance, Utilities, Government, Transportation, Technology, Entertainment, Communication, Metals, and Mining sectors.

DIFFERENTIATORS

- **MEASURABLE** - Performance backed by measured results
- **RELIABLE** - Quality controlled consistent measurement
- **CLEAR** - Ambiguity eliminated to create a clear path for each employee for accountability
- **CUSTOMIZED** - Can be custom scored based on your company's history

SIMPLE STAGED IMPLEMENTATION

1. **STAGE 1** - Safety assessments are completed by employees with and without chargeable accidents.
2. **STAGE 2** - Organizational results are compared/contrasted with national studies from multiple industries. Benchmarks are applied for hiring training and developing of employees.
3. **STAGE 3** - Results integrated into present safety program.
4. **STAGE 4** - Safety improvement review using a training and application process for employee development.
